

MOTION BY SUPERVISOR MICHAEL D. ANTONOVICH

OCTOBER 9, 2012

The continuing application of digital technologies to various government services is gaining prominence over the last decade. While many Los Angeles County departments have improved their web access for delivering information and services to the public, others have failed that transition to digital government (e-government). Every County department must have a clear e-government strategy and implementation plan for serving Los Angeles County residents.

I, THEREFORE, MOVE that the Board of Supervisors request the Citizen's Economy and Efficiency Commission conduct a review of the County's transition to electronic government applications that include online filing and access by citizens together with electronic processing and approval by County departments, and to recommend ways to improve efficiencies in our system.
